Hi Brian and Keith,
Sounds great. Thanks for the feedback. I'll go ahead and publish the new webpage to production this afternoon. It should go live either later this evening or tomorrow, after which I'll send everyone another email with the URL. Thanks again.

Regards,
Ron

Hi Brian,

Didn't know that the images were sent as thumbnails. Let me know if these are better (each one should be around 1 MB). If not - perhaps the images are compressed when emailed - try these, which are on the shared drive.

Here's the link:

Ron, those screenshots are about thumbprint size! I'm sure they're fine, but if you want me to review the text you'll have to resend in a different format. Even increasing the page size 400% wasn't helping.
I'm glad you are pursuing this advertisement!
Brian

Hi Brian and Keith,

I hope you both had a great Thanksgiving. Here's the next (potentially final) iteration of our lab's webpage short update with highlights from Radford and McAlester. Included are a few screenshots showing that content and photos that we plan to use (with proper credit to Angela and The Roanoke Times). Let me know if you have additional revisions to the text or photo captions. I've incorporated a few of Ved's suggestions, such as the links to the Radford news articles and updated photo captions.

Keith, let me know if the photos of McAlester, a few of which show the range and an open burn, are okay for us to use. If so, I'll go ahead and update the live website. Much appreciated.

Cheers,
Ron

Hi, Ved.

I don't think you need to ask her permission to show our footage, as long as she and RFAAP badges are not in view. If you are asking should we share our footage with her and she can use it as she wants, then the answer is "yes".

Brian

Thanks Brian:) Do you think we need to ask Commander Masson as well to share the Radford aerial footage? We can compile a short highlights video and launch it with our new website. You would all be welcome to use it as well.

Hi Brian and Keith,

I hope this message finds you well. Our group is interested in posting some information about our recent field deployments in McAlester and Radford on our lab webpage (www.nasa.gov/ames/las<<http://www.nasa.gov/ames/las>>), and are curious as to whether there are any caveats or restrictions on information or photos that we submit online. Let us know if you have any thoughts, and we'll be sure to respect your preferences on released information as well. Thanks!

Cheers,
Ron
